

Adaptive Grazing for Net Profits

September 5, 2024

Luke Jones

At Hays Family Farm, John and his family have tried other grazing systems, but it wasn't until he started implementing adaptive grazing management that he started to see positive results and in pastures and livestock. Come learn about soil health and how we can turn around degraded land into a profitable enterprise. Live in field demonstrations and observations will be made. Seeing is believing with regenerative agriculture and John and his family will have great examples to send you home excited for what can be in your own context.

This Understanding Ag Workshop will teach you:

- Grazing in the Midwest
- Reducing hay needs
- Year round grazing
- Adaptive grazing
- Encouraging diversity
- Improving soil health through grazing

Registration Cost

\$40 per person, limited seats

Registration Required

Lunch will be provided

Workshop Location

Hays Family Farm
7499 E County Road 800 N
Bainbridge, IN 46105

8:00 am until 3:00 pm
